

# Addition and Subtraction

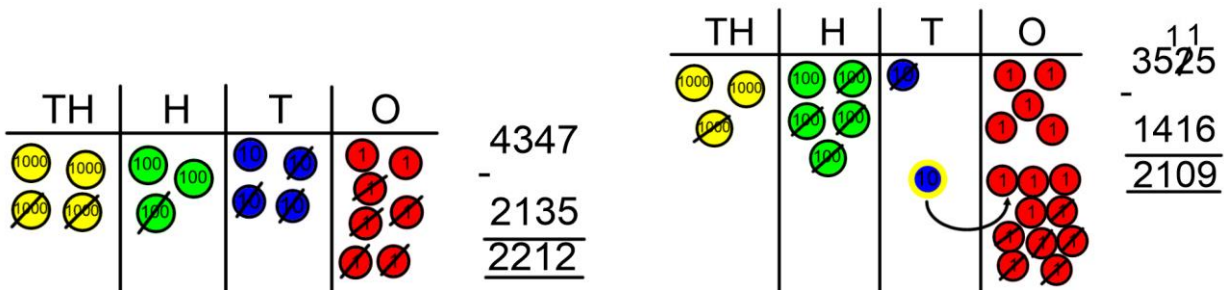

We can use place value counters to solve addition problems.

Work these out in the same way.

$3245 + 1052 =$      
  $2963 + 1234 =$      
  $4726 + 3254 =$      
  $5635 + 2436 =$

Now try subtraction.

Work these out in the same way.

$8654 - 3103 =$      
  $7251 - 3241 =$      
  $6329 - 4148 =$      
  $5425 - 3517 =$

Fill in the missing numbers:

$8372 - \boxed{\phantom{0000}} = 4027$      
  $8275 = \boxed{\phantom{0000}} + 3752$

Holly worked out the answer to  $5237 + 3685$ .

Can you explain what she has done wrong?

What is the correct answer?

$$\begin{array}{r} 5237 \\ + 3685 \\ \hline 8812 \\ \hline 11 \end{array}$$

If 4532 is the answer, what could the question be?

Create one addition and one subtraction problem with the answer of 4532.
