

We've had such a busy and fun Autumn term, acquiring more knowledge and skills across various subjects.

We begun by exploring who the Anglo-Saxon's were in History and linking this in with our English; to write a non-chronological report about the Anglo-Saxons.

With the use of our class guided reading books such as 'The Velveteen rabbit' and 'Beowolf', we have been exploring more themes, characters and expanding our vocabulary.

We have been investigating how we can live more sustainably on our planet, along with using plastic bags to create a piece of weaving. This took patience and resilience!

In mathematics, we have built upon our knowledge of number operations and problem-solving. We have learnt more advanced concepts in areas such as multiplication, division, addition and subtraction. Along side all of this, we have been knuckling down on improving our multiplication skills through the use of TTRS and many other resources.

In PE the we have had fun exercising, combining boxing techniques with aerobic and strength training techniques. We also completed bootcamp style circuits which promoted personal growth and self-confidence.

Not forgetting what fun we had during our Christmas Nativity!

Just a few of our topics for next term include the Vikings, sound, electricity and fractions.
